Mount Your Mac™

Under Desk Mounts for Apple™ and AJA Products

KAE Corporation is proud to offer several desk mount products for your Apple Power Mac G5™ & Mac Pro™, Mac Mini™, external hard drive, and the I/O HD audio interface unit from AJA Video. No modifications are necessary to any of the Apple Mac™ or AJA Video products.

DM-G5-S Stationary Desk Mount
(available in black or silver)

The DM-G5-S is a simple mount that screws to the bottom of your desk work surface. The Apple Power Mac G5™ or Mac Pro™ just slips onto the mount. A front flange keeps the unit securely in place. The DM-G5-S takes an additional 1.0 inch, making the total distance from the bottom of your desk work surface to the bottom of your Mac Pro™ 21.1 inches.

DM-G5-PO Pull Out Desk Mount
(available in black or silver)

The DM-G5-PO is similar to the DM-G5-S but with the added flexibility of pull out slides to allow you to access the rear and side of the Mac Pro™. The slide travel is 15 inches. This will allow you to get to the side of the computer for upgrades and also for additional cabling requirements. The slide case is screwed to the bottom of your desk work surface. The mount is attached to this slide case. The Apple Power Mac G5™ or Mac Pro™ just slips onto the mount. A front flange keeps the unit securely in place. A handle is provided on the slide case for ease of movement. The DM-G5-PO takes an additional 2.75 inches, making the total distance from the bottom of your desk work surface to the bottom of your Mac Pro™ 22.85 inches.

DM-G5-PO Pull Out 90° Swivel Desk Mount

The DM-G5-POS is essentially the same as the DM-G5-PO with the added facility of being able to swivel your Mac™ 90° once you pull out the unit on the slides. This allows full accessibility to the side of your Mac™ for upgrades and the rear for additional cabling requirements. The DM-G5-POS takes an additional 3.00 inches, making the total distance from the bottom of your desk work surface to the bottom of your Mac Pro™ 23.1 inches.

DM-MM Stationary Mount

The DM-MM is a stationary mount for the Mac Mini™. The DM-MM is a simple mount that screws to the bottom of your desk work surface. The Mac Mini™ just slips onto the mount. Front and rear flanges keep the unit securely in place. There are two slots to allow you to zip tie (cable tie) your cabling to the rear of mount.

DM-EX Stationary Mount

DM-AJA-S Stationary Mount

DM-AJA-PO Pull Out Mount

The DM-EX is a stationary mount for external drives for your Mac™ products. The DM-EX is a simple mount that screws to the bottom of your desk work surface. The external drives just slip onto the mount. Front and rear flanges keep the unit securely in place. There are two slots to allow you to zip tie (cable tie) your cabling to the rear of mount. The DM-EX will accept external devices up to 2.0 inches (height) x 3.8 inches (width) x 6.25 inches (depth).

The DM-AJA-S is a stationary mount for the Io HD from AJA Video. The DM-AJA-S is a simple mount that screws to the bottom of your desk work surface. The Io HD just slips onto the mount. Front and rear flanges keep the unit securely in place. For optional cable management, order the DM-G5-CM. The DM-AJA-PO is the pull out version, the DM-AJA-POS is the pull out version with 90° swivel to access cabling.

Options for the Under Desk Mounts

DM-G5-CM Cable Manager

The first is the DM-G5-CM Cable Manager. This unit attaches to the DM-G5-PO or DM-G5-POS, DM-AJA-P) or DM-AJA-POS pull out versions at the rear of the housing. This unit relieves the cabling connection stress on your rear connectors.

DM-G5-L Locking Clamp

The second option available, for the DM-G5-S, DM-G5-PO or DM-G5-POS versions, is the DM-G5-L Locking Clamp. The locking clamp comes with a keyed lock that sits up behind the mount making it difficult to access. It will prevent any 'snatch and grab' for units that are located in accessible areas or educational labs.

Mac Pro™, Power Mac G5™ and Mac Mini™ are registered trademarks of Apple Inc.
