## Notebook Drawer, Utility Drawers and Work Surfaces

DR-1 1U Pullout Drawer with Pencil Insert

DR-2 2U Rack Mount Utility Drawer

DR-2T 2U Utility Drawer with Flip Up Laminated Work Surface

NB-1 1U Pullout Notebook Drawer with Flip Down Front Panel and Cam Lock

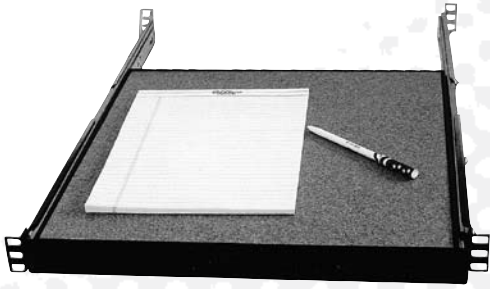

NB-1 Retainer

KAE Corporation offers several rack mount pullout drawers for the broadcast engineer. There are now four versions. A 1 rack unit (1.75" height) utility drawer DR-1, a 2 rack unit (3.50" height) utility drawer DR-2, a 4 rack unit (7" height) utility drawer with lock DR-4, and the new DR-2T 2U utility drawer with flip up laminated work surface. The DR-1, DR-2 and DR-4 utility drawers are great for storage of test leads, tools, office supplies, CDs, tapes and just about anything that you may need to have ready access to when working in your machine room. There is an optional pencil drawer insert, PEN-1, for the DR-1. The drawers are made from 14 gauge steel and are finished in black textured powder coat. They fit all standard 19" EIA racks. The drawers are 16" deep, have a capacity of 50 pounds. They fit 23"-30" deep racks.

As an option to the DR-4, we also offer a plastic CD Holder CD-4, that holds up to 30 CDs. You may have up to 3 CD-4 units in each DR-4 for a total of 90 CDs in one drawer.

KAE Corporation now offers the DR-2 T, an optional flip up furniture grade laminated work surface for its DR-2 2U Pull Out Utility Drawer. This option is only available for new versions of the DR-2 drawer and is factory fitted.

The NB-1 1U Pull Out Notebook Drawer with fold down front panel (makes it really easy and comfortable to type and use the mouse). The front panel also has a cam lock for security. As an option, the NB-1 comes with a retainer for use when traveling (truck or flight case). The rear of the drawer has a 'corral' for the notebook power block and cutouts for cabling.

POWS-1 Rack Mount Pullout Laminated Work Surface

POS-1 1U Rack Mount Pullout Shelf with PC Notebook

DR-4 with CD-4 4U Pullout Drawer with 3 CD Holders (up to 90 CDs)

KAE Corporation offers the broadcast engineer two versions of pullout work surfaces. Both units occupy 1 rack unit (1.75") of space. The Pullout Shelf is a metal shelf/work surface that allows the customer to have a ready surface to work on that is easily pushed back into the rack. The Pullout Laminate Work Surface provides a quality work area for the customer. This unit has an attractive laminated 3/4" furniture grade surface. Both units provide an ideal workspace that when fully extended is 16". The rack slides have a positive lock out when fully extended. The capacity of each unit is 50 pounds when fully extended. Also, both units fit all 19" EIA racks from 23-30" deep.
