PC Keyboard & Mouse Shelves and Drawers

POKBS-2 2U Pullout Swivel Keyboard Shelf with retractable Mouse Pad

POS-1-PC with Keyboard Slot

KBD-1 A Keyboard and Mouse Drawer

KAE Corporation offers four means to rack mount PC Keyboards and Mouse. These units are great for servicing your automation and file server systems. The POS-1-PC is based on our VTR mounting shelves and will support standard 14-19" PC CRT Monitors. There is an optional keyboard slot cut out and shelf that will house a full size (18") keyboard. L brackets are provided to prevent the monitor from shifting while the shelf is in motion.

The POKBS-2 is a 2U pullout swivel keyboard shelf/drawer with retractable mouse pad. When fully extended, the keyboard shelf swivels to accommodate a full size (18") PC Keyboard. We even provide the mouse pad. Adjustable rear brackets are provided for additional support.

KAE Corporation has designed the SKBS-1, a 1U in front of rack stationary shelf to hold a full size PC Keyboard and Mouse Pad (the mouse pad is included). A cutout allows the cabling to be fed back to the equipment. A 0.50" flange on all sides allow the keyboard and mouse to be secured. This is a very cost effective solution for all your file servers, automation and computer equipment that you are buying. The shelf is 8.0" deep.

SKBS-1 In Front of Rack Stationary Keyboard Shelf with Mouse Pad

The KBD-1 is a 1U drawer, with fold down front panel, that houses a customer supplied PC mini keyboard (up to 16.5" wide) and mouse/trackerball device. The KBD-1A is the same drawer with KAE Corporation supplying the mini keyboard, mouse and mouse pad.
