PC LCD Monitor Articulated Arm and Mounts

ARM-3 3U Rack Mount Arm for PC LCD Monitors

The ARM-3 is a 3U medium duty 16" articulated arm for mounting VESA 75 or VESA 100 PC LCD monitors. The capacity is 30 pounds, which will accommodate 15, 17 or 19" PC LCD monitors. Features include 180° tilt and 180° pivot as well as 360° screen rotation. Adjustable tension springs allow for smooth articulation in any direction.

ARM-3 T Rack Mount Arm for PC LCD Monitors, Mounts to Top of Rack

The ARM-3 will save 6-10 rack units when compared to rack mounting standard PC CRT monitors. The arm extends out when you need to get to the equipment behind the monitor. KAE Corporation also offers a version of the ARM-3, the ARM-3 T that mounts on top of the rack, essentially enabling you to have a PC LCD monitor that takes up NO rack units.

PCM-LCD 15-7U Monitor Mask and Shelf for PC 15" LCD Monitors

KAE Corporation has designed two new stationary shelves with monitor mask for 15" LCD PC Monitors. The PCM-LCD 15/8 and the PCM-LCD 15/7 are 8 rack units and 7 rack units respectively. The PCM-LCD 15/7 is specifically made for the NEC 1550V monitor. These masks allow the LCD Monitors to be mounted in racks either vertically or at an angle on control consoles. Adjustable brackets allow for LCD monitors 14.375-15.125" wide and 2.0-2.5" deep.

LCD-RM3 Stationary Rack Mount for PC LCD Monitors

LCD-RM3 with VESA100 mount

LCD-RM3 is a stationary mounting solution that allows the customer to mount a PC LCD monitor in the rack. The LCD-RM3 utilizes 3 rack units. It is adjustable to recess the LCD monitor into the rack (the monitor must be less than 17 3/8" wide). When extended out, the LCD-RM3 allows for wider monitors. In this case, the monitor would mount 1/2" in front of the front rack rails. This allows up to a 19" wide monitor to be mounted. Both VESA 75 and VESA 100 standard mounts are included. Capacity is 30 pounds.
