PORS Pull Out Swivel Rack System

PORS-14 14U Pull Out EIA Compliant 19" Rack System

KAE Corporation introduces the **PORS Pull Out 19" EIA Compliant Rack System** for use in cabinets and under desks and consoles. The **PORS Rack System** makes the installation and maintenance of equipment in cabinets and under desks and consoles easy and convenient. The **PORS Rack System** comes in 12 (PORS-12) and 14 (PORS-14) rack unit heights. This allows for 21" and 24 1/2" usable heights.

The **PORS Rack System** pulls out 19" on ball bearing slides, allowing for smooth and easy pull out. The units also swivel 90° to provide convenient access to cabling and products. Integral rear cable management support bars are provided. Marking holes for each rack unit makes installation even easier. The **PORS Rack System** has 10/32 tapped holes for ease of installation on the front rails as well as the rear rails.

The **PORS Rack System** is great for newsroom edit suites, conference rooms, and home theaters.

Model #	Usable Rack Units	Usable Height	Usable Height	Finished millwork openings	Depth**
PORS-12	12	21.0"	24.65"	19.25"	19.50"
PORS-14	14	24.5"	28.15"	19.25"	19.50"

**It is recommended that you leave an additional 1.0-2.0" clearance at the rear of the base pan for video, audio, data and power cabling.
